GROWERS OF DUTCH BULBS

To our customers:

We are really excited this year about our 1962 Fall Catalog and feel you will be too when you see the many new flower bulbs listed, most of them shown in color.

We have searched the world over so that your garden next spring will be a riot of color, not only from our own tulip fields in Holland do we import, but from France, Italy, Japan, China, Tibet and other lands.

We are very proud of our reputation for our fine bulbs, and ship only the finest ones available which are top size.

We regret that space does not allow us to print some of the many letters we have received, telling us how delighted they are with our bulbs.

Sincerely,

 Piet C. Van Bourgondien

Daffodils for NATURALIZING

Hundreds of thousands of Daffodils are used yearly for this purpose, because when once planted they continue without any care to give you immeasurable joy year after year.

Numerous varieties have proved very successful for this purpose and we will use no others. Practically all types of Daffodils contain some varieties suitable for this purpose, thereby increasing the number of varieties and adding greatly to the desire of naturalizing Daffodils.

Only sizes which are most desirable for naturalizing without continuous care are selected for your favorite garden spot, "the natural garden." Only varieties having proved to be hardy are selected for this purpose.

Practically any soil has been found suitable, but when planted under and among trees and in woodlands, the leaves of the trees should not be removed, as taking away this natural food will not only injure your trees but also will prevent the Daffodils from producing as they should.

Plant at least 8 inches deep but avoid places where water may collect at any time as they like drainage.

Place your order early as the demand is increasing for these bulbs at the special low prices we have adopted.

GENERAL MIXTURE is one of our most popular offerings and many are the letters of praise we have received regarding these superior bulbs. Plant them freely as all of these fine, early spring-flowering bulbs are of definitely high quality as well as rare value. \$1.00 per doz.; \$7.00 per 100; \$65.00 per 1000.

ALL YELLOW TRUMPETS including King Alfred, Emperor, other fine varieties. Top grade bulbs. 5 to 7-inch circumference. \$1.10 per doz.; \$7.50 per 100; \$70.00 per 1000.

We recommend it without hesitation, but point out that these lovely Lilies prefer a habitat with long, moist and cool growing seasons and a deep, rich, well-drained soil. They usually flower in August and September, a boon to any garden at this season. **Large bulbs, 7-8". \$1.25 each; 3 for \$3.50; \$13.00 per doz.**

AGAPANTHUS

Widely known as the "Blue Lily of the Nile," this enchanting flower is beautiful and far from the ordinary, yet easily grown. It is ideal for the window garden, the living room, the terrace, or in protected spots in the open. It will continue to bloom freely and beautifully every summer year after year, if given a large enough pot up north, or enough room down south, plus plenty of food and water; very heavy covering needed in northern states.

IRIS RETICULATA

IRIS RETICULATA

(Bulbous)

This lovely species is one of the treasures of the garden or rock garden. It can be described as a small form of the Dutch Iris, or Spanish Iris. Its main value lies in the fact that it can be forced into bloom in the house with the greatest ease. Six or eight bulbs put into a 4 or 5-inch pot when received, will bloom about Christmas time. The fragrant blooms remind one of a bunch of fresh Violets. Perfectly hardy with reasonable protection. Dark blue. 85c per doz.; \$5.00 per 100.

AUTUMNALE MAJOR. The only bulbs that will bloom indoors without soil, without water, without care. Place on the mantel, window ledge or table, and with no further attention on your part, it will reward you with its exquisite lovely blooms. Use these bulbs for gifts. The usefulness of the bulb does not end after the blossoms fade, for they may be planted outdoors in the Fall, and in the Spring luxuriant green foliage appears. When the foliage has died down, they will bloom in your garden in the fall, year after year. 75c ea.; 3 for \$1.75; 12 for \$6.00.

SOLEIL D'OR NARCISSUS

Soleil d'or resembles the Paperwhite Narcissus very much in habit, but is of an exquisite deep yellow color, with an orange-yellow cup. The culture is the same as for the Paperwhite narcissus. We expect to have some very fine stock of this variety to meet the steadily increased demand of the past few seasons. 3 for 75c; \$2.15 per doz.; \$14.00 per 100.

LILY-OF-THE-VALLEY

(For indoor growing)

These are the so-called retarded Lily-of-the-Valley pips. They have been kept in cold storage to prevent them from sprouting throughout the summer and autumn. Only top quality pips are used for forcing. Plant a dozen or more in a 5-inch pot. You may use soil, peat moss, or moss as a growing medium. Keep them moist and dark for two weeks after planting in a warm place then bring them into the light in a sunny window and you will grow fragrant flowers without any difficulty in a few days. All retarded Lily-of-the-Valley pips will be shipped during the first week of December in time for Christmas, not at any other time. \$2.75 per doz.; \$18.00 per 100.

FRENCH ROMAN HYACINTHS

French Roman Hyacinths are among the earliest bulbs to be had in flower. The bulbs arrive from France late in August, and, like all bulbs grown in the south of France, they may be had in flower from November all through the winter months, if potted up in September and at intervals of every two weeks. They are much prized for pots or cutting on account of their graceful appearance and delicate fragrance.
